

GTT Announces Launch of New Enhanced Private Line Offering - GTT Hub ServiceSM

MCLEAN, Va., March 26, 2008 – Global Telecom & Technology, Inc. (“GTT”), (OTCBB: GTLT), a global Multi-Network Operator (MNO), announced today that it has launched GTT Hub ServiceSM, a bundled hub and spoke private line offering, targeting carrier and enterprise customers worldwide.

GTT Hub ServiceSM is a wide-area network (WAN) solution that enables carriers, enterprises and value-added resellers to fan out multiple private line circuits from a single originating port to multiple locations - within a single country or around the globe. Because of its hub and spoke design, customers can use GTT Hub ServiceSM to rapidly deploy additional circuits to their network as their business needs grow. GTT Hub ServiceSM, available in short and long haul versions, connects customer locations in either limited geographical areas or distributed over longer distances.

GTT Hub ServiceSM provides customers with the security and performance of a private line network at highly competitive rates. Touted as a best of both worlds product, GTT Hub ServiceSM combines the reliability of secure private network connections with the scalability and cost-effectiveness of other WAN technologies. GTT Hub ServiceSM also supports a variety of customer traffic types (video, voice and data), as well as Class of Service (CoS) – features traditionally associated with meshed networks.

“We are very excited to launch our GTT Hub ServiceSM product line,” said Richard D. Calder, Jr., GTT’s president and CEO. “With GTT Hub ServiceSM our customers get a secure, private network that cost-effectively scales with their business. Our goal is to continue to develop products that reinforce our value proposition – the delivery of multi-carrier or multi-service solutions to large or global customers at competitive prices.”

**About GTT**

As a Multi-Network Operator, GTT combines multiple networks and technologies to design unique network solutions for its customers. By integrating components of multiple carrier networks, GTT can create the “best network” in a way that no single carrier can. GTT has taken the Multi-Network Operator strategy to a new level, through a combination of powerful network design tools; a global service footprint; a deep and broad set of strategic supplier relationships; and above all, an expert team committed to delivering outstanding end-to end customer service.

Headquartered just outside Washington, D.C. in McLean, Virginia and with offices in London, Paris, and Dusseldorf, GTT has over 150 carrier partnerships and access to over 100,000 network points of presence around the world. GTT provides a global service footprint that supports more than 300 businesses in more than 70 countries, worldwide. For more information visit the GTT web site: www.gt-t.net.
